not only for pros

SPORTING

Practise makes perfect

Our new SPORTING series offers many useful items optimally adapted to the training that help to exercise a dog in the right way and become active in sports.

The product range is suitable for active dog owners and dog sports professionals alike.

For obedience, agility, dog sport competitions, man trailing – the items of the SPORTING series combine fun in the game with functionality.

The products have been developed in cooperation with successful dog sports persons, have been functionally optimized and designed for the heavy strain in dog sports.

Important for every training:

- Make sure there is an interval of at least 1 hour between feeding and training
- Adapt the training to age and physical condition of your pet
- For outdoor training, the ground should be soft and springy to be gentle on the dog's joints
- Begin each training with a warm-up for your dog
- Train in short units, it is a good idea to train several times per day or per week
- Always praise your dog if he does something right and reward him with little treats or toys
- Finish the training before your dog has no more energy left or does not feel like training any longer
- It is important to let your dog cool down slowly after physical training
- Provide water for your dog repeatedly after a training unit

For stop-the-pull collars: The continuously adjustable collars with woven-in reflecting stripes are impressively comfortable to wear. Our extra wide stop-the-pull collars with neoprene padding and collars with strain relief are suitable for all dogs from puppies and young dogs to sport dogs.

Stop-the-pull
#207308/9/10

Collars
#207305/6/7

Training leashes
without hand loop
#207300/1

Tracking leashes with/
without hand loops
#207315/6/7

The black coated brass trigger hooks of our training and tracking leashes are particularly break-proof and salt-water resistant. The woven-in rubber coating makes the leashes non-slip and grippy. Depending on their length, they are suitable e.g. for training or practising distance commands.

The All-Rounder among the Clickers

The All-in-One Clicker with finger and hand loop as well as 4-fold adjustable volume is optimal for indoor and outdoor use.

The clicker guarantees the same consistent sound every time. It is always at hand thanks to the spiral loop for your wrist or the option of attaching it e.g. to your belt loop.

Clicker training is a so-called marker training that provides fun and success for you and your dog when training tricks, everyday behaviour or in dog sport.

The dog is conditioned to the "click", which is always followed by a positive reinforcement. As soon as the dog shows the desired, correct behaviour, the dog handler clicks and gives an immediate reward. That way the dog understands that this behaviour was positive and that it is worthwhile to repeat it.

Clicker training is so effective because the click sound allows very precise reinforcement and praise, and training is possible without physical aids.

Drinking Bottle
with Drinking Bowl
#24606

Rewarding the right way

Not only precise timing, but also the kind of reward is important in training. Depending on the dog's motivation and type of exercise, the reward can be a toy or a treat in addition to the sound.

Rewarding with treats

Treats are a good way to reward a dog quietly for learning new commands and for improving concentration.

Trainer Snack
mini-Hearts, 200 g
#31524

Snaps open and close with one hand

Our handy snack bag can be used on a belt or with a clip. It only needs one touch to open and close the bag reliably and securely. Separate compartments and attachment rings for clickers or dog dirt bag dispensers allow effective and organized training.

Balls with and without strap
#32850/1

Mot®-Toy
#32825/6
developed by the experienced
and well-known author and
dog trainer Ekard Lind

The robust and resilient materials of the toys can withstand the high demands of training and serve to reward and motivate. The flexible and extremely hard balls and jumpers on ropes can be held securely and are optimal for tug-of-war games. The stitched training dummies have no hard edges and are particularly tooth-friendly.

Why blue and yellow?

Quite simple: These are the colours dogs can see best.

Training Dummies
#32860/1/2/3

Playing Motivating Training

Balls and Jumpers
on Ropes
#32820/1/4/7/8

Ball with Holes
#32822/3

Rewarding with a Toy

Often toys are more motivating than snacks. They encourage movement, which makes them suitable for speeding up what has just been learned.

Dog Disc
#32852

Ring
#32853

The soft discs and rings are just as floatable as the very hard toys. Among other things, they are ideal for training near and in the water.

Jumper
#32842/3

Stick
#32844/5

Ball
#32840/1

Training the command "Out"

Use two identical toys for this.
Training example: While the dog runs to get the first ball, call him and take the second ball out of your pocket at the same time. When the dog comes to you, give immediate reinforcement and use the command "Out". Your dog will understand that the game continues after you have said "Out", and easily learns to obey the command without hesitating.

For Activating and Gymnastics Training

Balance Cushion
incl. Pump
#32093

Obstacles and a balance cushion round off the training and help to increase concentration, body awareness and coordination. The adjustable level of hardness of the cushion and the variable options for combining the pylons and poles of the obstacles make these products suitable for various uses. The products are suitable for (physio-)therapeutic treatment and can be used with older or ill dogs as well as for recovery after injuries.

Obstacles

- #32091 – 6 pylons + 3 poles,
ø 23 x 30 cm/78 cm
- #32092 – 4 pylons + 2 poles,
ø 30 x 50 cm/100 cm
